

NFSA Seminar 8588 - Inspection and Testing For the Sprinkler Industry

Seminar Description: This interactive seminar provides an introduction to the various types of water-based fire protection systems as well as an in-depth exploration of the codes, standards and other documents used during the inspection and testing process. The three day seminar is designed for individuals interested in obtaining certification as an inspection and testing technician for water-based fire protection systems.

Pre-payment is required. The cost is \$100 for fire service personnel and \$150 for sprinkler contractors.

As an ICC preferred provider, the NFSA offers 18 credit hours after completion of this seminar.
